

Math Jeopardy

A MATHguide.com Review Game Based on the television gameshow.

All students will be divided into teams of 3 - 4 students/team. Every student, called a player, will work cooperatively only within his/her assigned team. The rules below will handle specific situations:

Playing Field

- The questions asked to the teams will be divided into categories.
- The questions will range in difficulty from easy to hard, 1 - 5 points.

Category Number	Category Name

Question Round

- A question will be asked by the referee (teacher) that all teams may answer. The first question will be randomly determined; thereafter, the team who last answered a question correctly will control the category and difficulty selection.
- Teams will 'buzz in' by having any student raise a hand while saying their team number. Once a team is identified, the referee will choose any player from that team to explain the answer.
- If the answer is correct, the player's team will earn points equal to the difficulty rating of the problem.
- If the answer is incorrect, the player's team will be deducted points equal to the difficulty rating of the problem and other teams may 'buzz in' until all teams are exhausted.
